Surgical Pathology Report

Name : Mrs. USHA PUROHIT

Path No : 21W-10087

Age : 63 years Gender : Female

Referred by : Dr R. K. Deshpande

Accessioned on : 08 Oct 2021 11:42 AM

Reported on : 12 Oct 2021 11:42 AM

Nature of material : CT guided core biopsy of portal node

CLINICAL DATA

Moderately differentiated adenocarcinoma gall bladder with liver metastasis - treated.

GROSS APPEARANCE

No. of containers received: 4

Biopsy in formalin: Yes

Grossed by: Dr. Rohan Sardana

Container 1) Received a single linear core & two tiny bits of tissue, measuring approximately 0.1 to 0.3 cm. Submitted entirely in one paraffin block.

Container 2) Received two linear cores & a single tiny bit of tissue, measuring approximately 0.1 to 0.3 cm. Submitted entirely in one paraffin block.

Container 3) Received three linear cores of tissue, measuring approximately 0.2 to 0.3 cm. Submitted entirely in one paraffin block.

Container 4) Received a single linear core and a single tiny bit of tissue, measuring approximately 0.1 to 0.7 cm. Submitted entirely in one paraffin block.

MICROSCOPIC APPEARANCE

The biopsy reveals a metastatic poorly differentiated carcinoma in a desmoplastic and inflamed stroma. The tumor cells are large, polygonal and seen in irregular nests, cords & few glands. There is a mixed inflammation.

Immunohistochemistry was performed on paraffin block no. (2). The tumor cells express CK 7 & CK 19 and are immunonegative for CK 20, CA 19.9, HSA, arginase & synaptophysin.
